PROFESSIONAL SUMMARY

Entry-level Python Developer with a strong foundation in Python, MySQL, HTML, CSS, and JavaScript. Skilled in developing projects with database integration and problem-solving abilities. Passionate about contributing to collaborative development environments while continuously learning new technologies.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science **2021 – 2025**

Dhanalakshmi College of Engineering, Chennai

Percentage: 80%

Higher Secondary Certificate (HSC) **2021**

Don Bosco Matriculation Higher Secondary School, Pannur

Percentage: 80%

Secondary School Leaving Certificate (SSLC) **2019**

Don Bosco Matriculation Higher Secondary School, Pannur

Percentage: 78%

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, JavaScript
- **Backend Technologies:** Django
- **Web Technologies:** HTML, CSS, React.js
- **Databases & Tools:** MySQL, SQLite, VS Code, PyCharm, Git, GitHub, Microsoft 365
- **Other Skills:** Figma, AR/VR Development

PROJECTS

Weather Forecasting Web Application (Final Year Project)

- Developed a real-time weather forecasting web application using HTML, CSS, JavaScript, and Weather APIs.
- Implemented features like 5-day forecast, air quality, UV index, and AI voice search.
- Built a responsive dashboard with live weather updates and location-based search.

Stock Price Prediction

- Developed a stock price prediction model using Python and historical stock market data.
- Applied Time Series Analysis (ARIMA), Machine Learning (Random Forest, Gradient Boosting), and Deep Learning (LSTM) techniques.
- Performed data preprocessing, feature engineering, and visualization using Matplotlib and Seaborn in Google Colab.

EXPERIENCE

RJ ENTERPRISES – Admin / Operations Support **Aug 2025 – Apr 2026**

- Managed manpower coordination, employee records, and daily operational activities.
- Supported NAPS registration, onboarding process, and candidate coordination for smooth workflow execution.

PRACTICAL TRAINING & LEARNING

- Built responsive web applications using HTML, CSS, JavaScript, React.js, and Django.
- Gained hands-on experience in Python programming, CRUD operations, and database management using MySQL and SQLite.
- Practiced API integration and backend development using Django.
